"1892" Pure Aluminum Ware Break, Scorch or Burn Will Not Rust, Crack,

Cheapest Because Best

WERE at last is the ideal kitch and cooking utensil-"THE WARE THAT WEARS"made from Pure Spun Aluminum, and

guaranteed by the makers to last 25 years with average usage. "Spun" Aluminum, mind you, not cast Aluminum, which will sometimes crack and scale. Spun Aluminum Ware will never crack, peel, scale or hr. ak

Costs a trifle more than ordinary enamel ware, but is many times cheaper in the long run, because of its wonderful durability and fuel saving. Enamel ware is iron coated with colored glass. Iron expands with heat. Colored glass does not, but chips off into the food with dangerous results to those who eat it.

That the use of enamel kitchen ware causes cancer is a view held by some eminent medical authorities. Dr. William H. Diefanbach of New York, in a paper entitled "Observations on the Etiology of Cancer," read before the Bureau of Sanitary Science and Public Health during the session of the International Homeopathic Congress at Atlantic City, discussed this subject.

According to a special dispatch to the Philadelphia North American, Dr. Diefanbach advanced the argument that chipping

Will Last a Lifetime

of the hard-coated dishes used in preparation of meals allowed minute but dangerous particles of foreign matter to become mixed with the

food, these being taken into the stomach, where the cancerous growth is caused by abrasions which they make in the walls of the organ.

"1892" Pure Aluminum Ware saves Com doctors' bills. It enables you to bake bread, pies, pan cakes, etc., without grease, which is the great cause of dyspepsia and indigestion. Aluminum griddles require no grease; hence are smokeless and odorless.

"1892" Pure Aluminum Ware will not scorch or burn, is easily cleaned, will not rust, or corrode. Handsome in appearance. Looks like silver, but weighs only about one-fourth as much, and is light and convenient to handle.

The original and only genuine Spun Aluminum Ware is made by the Illinois Pure Aluminum Co. at Lemont, Ill. Every piece bearing their trade-mark, the manual piece bearing the pi hygienic, and guaranteed for 25 years.

See that you get the right goods and accept no substitute.

Only a few of the "1892" Pure Aluminum Cooking Utensils are shown here. Complete line will be found at SNYDER HARDWARE CO., Louisa, Ky.
